

NSQHS Dental Accreditation

Consultancy Services

Let us remove the burdon and guarantee your accreditation

Having to work your way through the requirements of accreditation is time consuming and inefficient particularly when your speciality is treating patients.

At Dosel we specialise in accreditation and can achieve accreditation for your practice in less time and at less cost then having your practice manager try to manage your practice and achieve accreditation at the same time.

Our Dosel Web manager platform is a dedicated cloud based platform that automates the maintenance of your accreditation requirements and collates all documentation for audit purposes. The Dosel Web manager mitigates the risk of changing staff and ensure policies, procedures and training requirements are maintained.

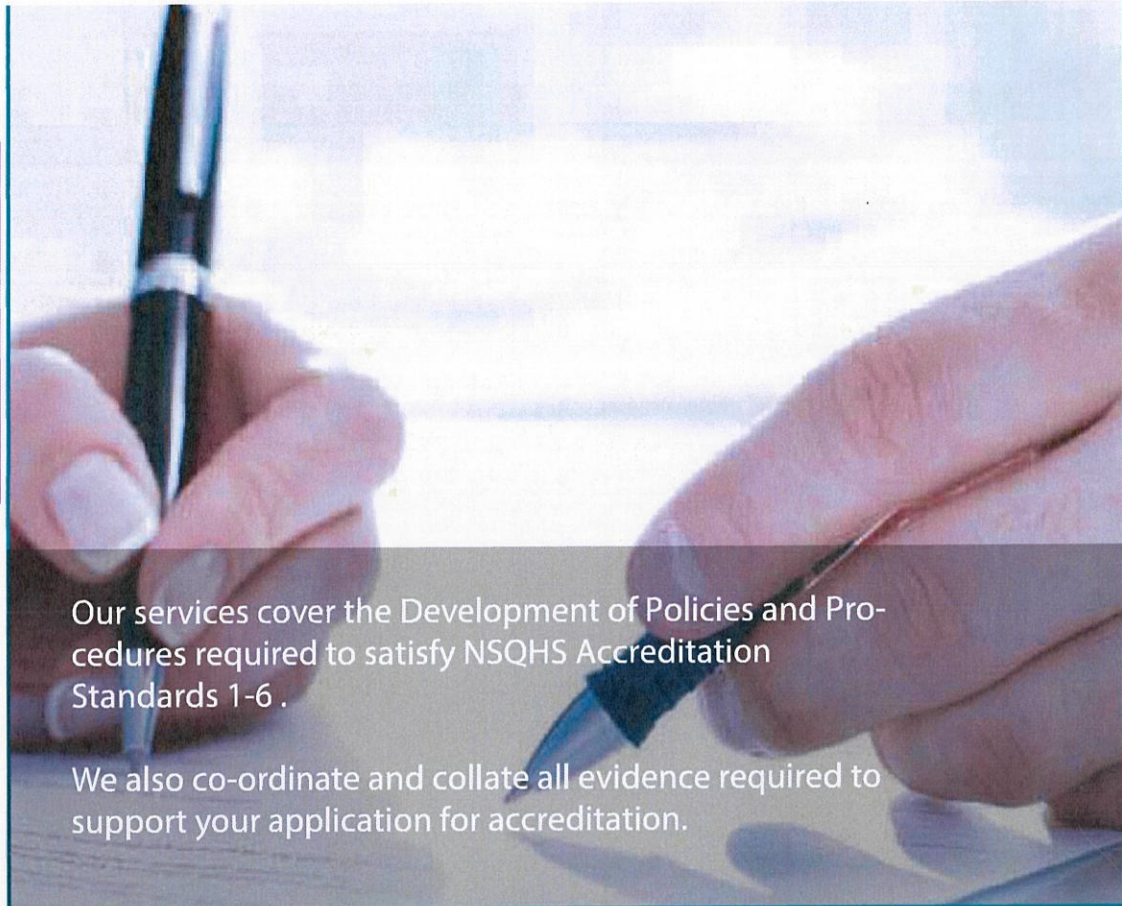

Automated Web Based Accreditation

Accreditations

Our services cover the Development of Policies and Procedures required to satisfy NSQHS Accreditation Standards 1-6 .

We also co-ordinate and collate all evidence required to support your application for accreditation.

The 6 standards of accreditation are :

Standard 1: Governance for Safety and Quality in Health Service Organisations

- Governance and quality improvement systems
- Clinical practice
- Performance and skills management
- Incidents and complaints management
- Patient rights and engagement

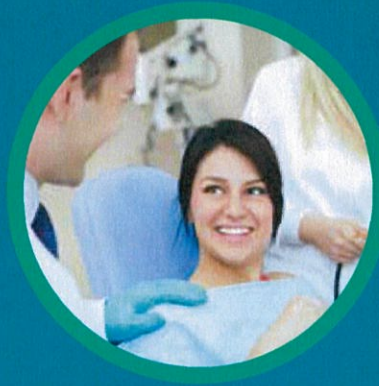

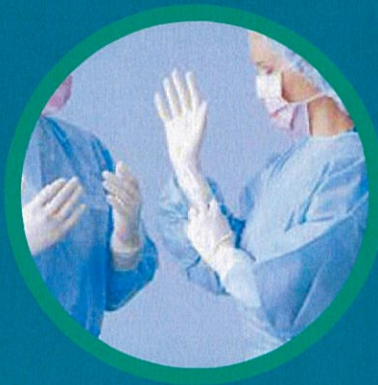

Standard 2: Partnering with Consumers

- Consumer partnership in service planning
- Consumer partnership in designing care
- Consumer partnership in service measurement and evaluation

Standard 3: Preventing and Controlling Healthcare Associated Infections

- Governance and systems for infection prevention, control and surveillance
- Infection prevention and control strategies
- Managing patients with infections or colonisations
- Antimicrobial stewardship
- Cleaning, disinfection and sterilisation
- Communicating with patients and carers

Standard 4: Medication Safety

- Governance and systems for medication safety
- Documentation of patient information
- Medication management processes
- Continuity of medication management
- Communicating with patients and carers

Standard 5: Patient Identification and Procedure Matching

- Identification of individual patients
- Processes to transfer care
- Processes to match patients and their care

Standard 6: Clinical Handover

- Governance and leadership for effective clinical handover
- Clinical handover processes
- Patient and carer involvement in clinical handover

Accreditation is the process in which certification of competency, authority, or credibility is presented to your patients.

Dental accreditation is not mandatory for private dental practices but patients want to know that you have a quality practice.

For this purpose, having accreditation enables patients to filter their search to find those practices who have been accredited.

Dosel Australasia is the only organisation to offer professional consultancy services to assist dental practitioners to gain NSQHS Dental Accreditation and maintain it through our interactive web based management system.

Dosel guarantees accreditation based on receipt of required evidence from practices.
